List of Changes

List of Changes between May, June and July, 2003. Where possible, all changes (with the exception of index entries) are highlighted in Grey.

Added new web sites (in alphabetical order):

- British Computing Society
- Center for Professional and Applied Ethics
- Qualified Project Management Professional (QPMP)
- The Performance Institute Reason Foundation
- The W. Maurice Young Centre for Applied Ethics
- The CBT Workshop
- Pacific Edge
- PMO To GO
- SpeeDEV
- State of Texas - Department of Information Resources
- Virtuelle Projekte (Virtual Projects)

Added new categories called Portfolio Management and Humour

Updated information on the following web sites:

- PMOstep
- Topica Newsgroup

Begun verifying URL addresses. All text in "Comic Sans MS" have been verified as valid.

Best Practices

Centre for Business Practices Consortium.

The Consortium is an elite group of management practitioners created to benchmark project management practices. They use web-based surveys to gather information on the actual practice of project management in large organizations.. A good source of related Project Management links, including a project maturity model. They also provide a free monthly electronic newsletter, for more information see <http://www.cbponline.com/>

Information Technology Infrastructure Library.

ITIL (Information Technology Infrastructure Library) is a set of books that comprehensively and systematically presents best practices in all phases of the management of an information system including Service Level agreements (SLA).

Each book describes the "infrastructure" -- the hardware, software, computer related communications, documentation, skills, and processes -- required to support one activity of managing an information system. Each book covers a function or aspect of information technology management, providing cross-references to the other books. Together the books form a unique reference set for the management of installed software.

The Library was produced by CCTA, the Government Center for Information Systems, in consultation with government and industry in the United Kingdom, for more information see <http://www.softwaremanagement.com/>

United Kingdom Cabinet Office publications - IT Infrastructure Library

Information Technology Infrastructure Library (ITIL) is the industry standard for comprehensive documentation of best practice for IT Service management. Used by many hundreds of organisations around the world, a whole ITIL philosophy has grown up around the guidance contained within the ITIL books.

ITIL consists of a series of books giving guidance on the provision of quality IT services, and on the accommodation and environmental facilities needed to support information technology. ITIL has been developed in recognition of organisations growing dependency on IT and embodies best practices for IT service management.

At present there are 49 ITIL titles. Ten of the books are considered to be core ITIL titles which are at present being restructured into the new Service Support and Service Delivery sets. There are three other sets currently in development. Information regarding ITIL can be found at <http://www.itil.co.uk>

Project Management Organizations

Advanced Projects Institute

The focus is on Critical Chain Project Management (CCPM)
<http://advanced-projects.com/FAQ.htm>

American Society For the Advancement of Project Management (ASPM)

The American Society For the Advancement of Project Management (ASPM) is a new not-for-profit professional society dedicated to advancing the project management discipline.

ASAPM is a member driven organization with member development in all professional development activities. Volunteers
www.asapm.org

Association for Project Management

<http://www.apm.org.uk/>

Australian Institute of Project Management (AIPM)

The Australian Institute of Project Management (AIPM) is the peak body for project management in Australia. Formed in 1976, as the Project Managers' Forum, the AIPM has been instrumental in progressing the profession of project management over the past 25 years

The AIPM's role is to improve the knowledge, skills and competence of project team members, project managers and project directors, all of whom play a key role in the achievement of business objectives, not just project objectives. The AIPM also aims to ensure that those involved at other levels in an organisation and the community generally, understand the key role of project management in today's society. <http://www.aipm.com.au/html/>

Australian Performance Management Associated Incorporated (APMA)

The Australian Performance Management Associated Incorporated (APMA) is a non-profit, professional association dedicated to the exchange of information on performance measurement aspects of project management.) The purpose of the association is to provide focus and structure in the disciplines and integration of project management and

performance measurement. This is useful to Program Managers, Performance Measurement Specialists, Cost/Schedule Control System Criteria Analysts, and Senior Managers directing these types of program activities in both Government and Industry, as well as consultants, and providers of computer software for these purposes.

The site includes an article on Earned Value and a free newsletter.

<http://www.austpma.org.au/>

Association For Project Management

Based in the United Kingdom, the Association for Project Management (APM) publishes the APM Body of Knowledge. The APM provides project management training and certification as well. You can learn more at <http://www.apmgroup.co.uk/>

European Institute of Advanced Project and Contract Management (EPCI)

<http://www.epci.no/>

International Project Management Association (IPMA)

The International Project Management Association (IPMA) is a non-profit, Swiss registered organization, with a Secretarial office based in the United Kingdom. Its function is to be the prime promoter of project management internationally, through its membership network of national project management associations around the world. Additionally it has many individual members, people and companies, as well as co-operative agreements with related organizations world-wide, to give it a truly world-wide influence.

<http://www.ipma.ch/>

Japan Project Management Forum (JPMF)

The Japan Project Management Forum (JPMF) is a member-driven and non-profit associational organization for project management professionals. JPMF was founded in December 1998 as a division of The Engineering Advancement Association of Japan (ENAA) for promoting the project management professionalism in Japan. Anyone, regardless ENAA membership, who relates to project management, is welcome to join JPM.

Software Program Managers Network

Software Program Managers Network (SPMN) mission is directed by the United States Congress to address the very serious threat to, and significant impact on, Armed Service acquisition programs regarding the acute shortage of trained U.S. personnel with the requisite software skills necessary to design and build the large-scale software systems needed to maintain the United States technological edge for our deployed forces and to support force deployment. The SPMN's mission is to enable managers of large-scale, software-intensive development or maintenance projects to more effectively manage and succeed by identifying and conveying to them best management practices, lessons learned, and directly useful support.

The web site includes a number of items including RiskRadar , Best Practices
<http://www.spmn.com/>

Students Of Project Management

The Project Management Institute Students of Project Management (SoPM) have created a web site. Formed to address the interests, needs, and concerns of a growing population within PMI: students. The term 'student' is used in a broad manner here to mean anyone interested in learning more about project management. This could include, but is not limited to, practitioners, educators, life-long learners, and of course, 'traditional' students who may be enrolled in business and project management programs. Including all of these diverse groups will enable the SIG to foster a rich learning environment for all. <http://www.ltugcom.org/SOPM/>

<http://www.qaiusa.com/>

Quality Plus Technologies Incorporated

Quality Plus Technologies, Incorporated is a leading software industry provider of workable measurement solutions (their slogan is Software Measurement Solutions -- POWERful(sm) Results!) Their concentration is on SOFTWARE project management measures -- particularly in the areas of approaches to measurement (PSM and GQM in particular), metrics for estimating and project tracking and control (estimates, requirements sizing and articulation, requirements management, scope and change management, test coverage, etc.), post partum (note not post MORTEM -- they believe project delivery is a birth process not a death one!) lessons learned, and maximizing ROI (return on investment) for investments in measurement and CMM(R) and CMMI(SM). They also feature team members with expertise in CMM(R)/CMMI(SM) assessments and SPICE assessments.

Quality Plus Technologies Incorporate's,. team of experts will teach and consult anywhere in the world (save for a few hot spots where our team would be in physical danger) -- and are becoming well established for not only our excellent professional training, but also our ability to maximize training transference and translate technical information into easily digestible and immediately applicable measurement principles.

The site offers a free newsletter on software measurements and function points, plus a free newsletter. <http://www.qualityplustech.com/>

Risk Management

Organizations

Project Management Institute - Risk Management Special Interest Group
Project Management Institute (PMI) Risk Special Interest Group website
<http://www.risksig.com/>

Center for Risk Management

United States Department of Energy's (DOE's) Center for Risk Excellence. The Center develops and implements policy practices, guidance, tools, support, and training that result in risk-based decisions that protect both human health and the environment.
<http://riskcenter.doe.gov/>

Tools

Applied Decision Analysis

Applied Decision Analysis makes a software tool called DPL (Decision Programming Language) is decision analysis software developed to meet the requirements of decision-makers in business and government. DPL offers an advanced synthesis of the two major decision-making tools, influence diagrams and decision trees (Figure 2), which assist in structuring complete and focused analyses.
<http://www.adainc.com/sw/whatis.html>

Rational Rose Software

The Rational Unified Process (RUP) is a Web-enabled software engineering process that enhances team productivity and delivers software best practices to all team members. RUP is an online mentor that makes process practical by providing extensive guidelines, templates, and examples for all critical e-development activities. RUP's e-business specific content provides explicit guidance in areas such as business modeling, Web architectures and testing for the Web.
<http://www.rational.com/products/rup/index.jsp>

Risk Analysis And Cost Management (RACM)

A Statistical Cost Control Tool <http://www.racm-inc.com/>

Risk Services and Technology

Risk Services & Technology (RST), focuses on introducing Project Risk Management discipline to your organization on a long-standing and mutually rewarding basis. . They make and distribute a software product called Risktrak.

PROJECT MANAGEMENT PROFESSIONAL (PMP)

Certificate of Added Qualifications (CAQ)

The Project Management Institute has announced a Certificate of Added Qualification (CAQ). For additional information and to download their handbook, please see the PMI web site at www.pmi.org.

Qualified Project Management Professional (QPMP)

Project Management Associates (PMA) is a non-profit registered professional body of projects and business managers with the aim of strengthening project management movement in India. PMA which came into existence in 1993 is India's National Project Management Association.

PMA's QPMP certification programme is based on the Association for Project Management (APM) United Kingdom's (UK) Body of Knowledge. APM, United Kingdom is the second largest national association of project management professionals in the world. The QPMP examination will be based on the questions from the database maintained and developed by APM, UK.

<http://www.cepm.com/qpmp/general.htm>

Project Management Office

KLR Consulting – PMO Office

<http://www.klr.com/PMO.htm>

PMOffice

Systemcorp delivers PMOffice™ for IT; their real-time Web-centric Enterprise Project Management (EPM) solution designed to track projects, people and performance across all programs. The product's Central Global Repository aggregates enterprise data from all project areas. Combined with its Portfolio Viewer™, PMOffice™ provides the requisite real-time global views and reports needed to manage all project phases, optimizing resources and reducing project waste. The site includes an excellent variety of white papers and articles. <http://www.systemcorp.com/>

<http://www.pmi-pmosig.org/>

PMO discussion group

<http://ebiz.netopia.com/pmo/workclothing/list.nhtml?profile=workclothing>

This used to be part of the **Mid-America Regional PMO Newsletter**. The **Mid-American PMO** regional Special Interest Group appears to be merged into PMI's PMO-

SIG (<http://www.pmi-pmosig.org/>). The only item remaining at this web site is a PMO discussion group. This site appears to be a PMO discussion group archive. The last posting is June 2002 and there appears to be no method of posting new questions.

PMO Step

PMOStep is a web site focused on the building a Project Management Office (PMO), and then using the PMO to deploy and support project management methodology within a company. It is a holistic approach that looks at the multiple aspects required to implement organizational changes. Sections include the deployment approach, training, coaching, methodology management, a document repository, project auditing and collecting the right set of metrics. PMOStep contains processes, best practices and templates to help make your PMO successful. <http://www.pmostep.com/>

Site has a nice set of links to other PMO resources, for more information see <http://www.pmostep.com/298.3AdditionalPMOResources-Links.htm>

PMO Service

E-ProjectManagers

E-ProjectManagers.com provides a Web PMO that contains project management templates designed to jump start project management efforts. The web PMO is a guide and central location for important management documents. It clearly provides an outline for project life-cycle phase tasks and deliverables. It contains hyper-links to recommended documents and information.

There is also an option to implement a web PMO for your company and / or clients. The interface is fully customizable and can match your Company's look-and-feel. www.e-ProjectManagers.com

Measurement/Metrics

College of Performance Measurement

The College of Performance Measurement (CPM) was originally established as the Performance Measurement Association and became the first PMI college in 1999.

The College of Performance Measurement (CPM) mission is to facilitate the development and exchange of Earned Value Measurement (EVM) standards practices among global PMI components. http://www.cpm-pmi.org/topLevelNav/about_cpm.htm

Level Of-Effort (LOE)

NHM Enterprises

Comparison between Earned Value and Level-Of-Effort (LOE). . Set includes a number of white papers including templates, FAQ and links to other Project Management sites. The site is owned and maintained by Noel N Harroff.

<http://www.nnh.com/ev/perform.html>

Return On Investment (ROI)

This section and references need to be developed.

What is your Return on Project Investment

Study being sponsored by Project Management Institute and University of Berkeley to determine the value of project management. Study is being done by Dr. William Ibbs. The site also includes some papers and reference material on the value of project management. <http://www.ce.berkeley.edu/pmroi/>

Centre for the Research in The Management of Projects

http://www.umist.ac.uk/CRMP/management_of_projects.htm

INDECO Ltd - International Management Consultants and Project Managers

INDECO is a management consultancy in Programme and Project Management, Procurement, Organisational Development, and the application of eBusiness within these areas of expertise. The site has two papers on Return-On-Investment by their Chief Executive Officer (CEO) Dr. Petere Morris.

<http://www.indeco.co.uk/wpapers.htm>

Return On Assets (ROA)

The return on assets ratio indicates how effectively the assets of your business are working to generate profit.

This section and references need to be developed.

Project Management Methodologies

Bates Project Management Model

See www.bates.ca

EXtreme Project Management (XPM)

This Executive Report examines the three major forces driving the need for a new paradigm of project management, one that is far removed from the models implied in the Microsoft and PMI ads. With the stage thus set, the author (Rob Thomsett) details the methods behind extreme project management (XPM), which was developed to parallel extreme programming (XP) and other light methodologies for the project management side of today's software projects.

General

University of Portsmouth, United Kingdom. A PERSONAL WEBSITE OF George Allan. George has an interest in project methodologies and development methodologies. The web site list about 30 different methodologies. <http://www.sis.port.ac.uk/~allangw/pm-mthds.htm>

PRoject in Controlled Environments (PRINCE)

PRINCE (PRojects IN Controlled Environments) is a structured method for effective management of any size or type of project. It is the standard method for use in United Kingdom Government Departments and is used increasingly in the private sector and Local government. An increasing number of overseas Governments and multi-national companies have adopted the method, or integrated it within their existing project management approaches.

Ten Steps

This web site provides project management consulting services. In addition, this web site is designed to provide the information necessary to successfully manage projects of all kinds. In many project management sites you are sent to links to order books. On others, you find a professor's notes from a college class. Here you will find much of what you need to be a successful Project Manager, including a step by step approach, starting with the basics and getting as sophisticated as you need for your particular project. .

The TenStep Project Management Process is a methodology for managing work as a project. It is set up to be as flexible as you need to manage your project. For instance, it may not make sense to spend a lot of time on risk management for a project that is 500 hours and is similar to many that were done before. That does not imply that you ignore potential risks - just that you do not spend as much time as you might on another project - say one where you were implementing new technology.

<http://www.tenstep.com/>

The Enhanced Management Framework

Information about large Information Technology project in the public sector. The Enhanced Management Framework (EMF) was approved by the Canadian government's Treasury Board in May, 1996 and departments are directed to apply this framework to all projects that have a significant information management or technology component.

The EMF is designed to ensure that government information technology projects fully meet the needs of the business functions they are intended to support, deliver all expected benefits and are completed on time and on budget.

The EMF provides solutions to project management concerns experienced in the federal government. It comprises principles, best practices, methodologies, tools, templates, handbooks, guides and standards. These solutions are all accessible through this site.

<http://www.cio-dpi.gc.ca/emf/>

Software Engineering

Agile Software Development

The AgileAlliance is a non-profit organization dedicated to promoting the concepts of agile software development, and helping organizations adopt those concepts. Those

concepts are outlined by the Manifesto for Agile Software Development. The AgileAlliance germinated in the fertilizer of the original AgileAlliance, a group of software professionals that had developed and were practicing lightweight approaches to software development. Responding to requests for a more open, inclusive, and visible way for everyone to participate, most of the founders of the AgileAlliance defined and established the non-profit AgileAlliance. This organization was designed to be lightweight, initially only consisting of a board of directors, one administrator, and a set of bylaws. Just like agile processes, all work and operations within the AgileAlliance is intended to emerge from subsets of members that self-organize into programs. The board of directors had to resist impulses to do top-down planning and is watching to see how successfully the organization emerges and succeeds following agile principles.

COCOMO II

General

COCOMO (CONstructive COst MOdel) is a screen-oriented, interactive software package that assists in budgetary planning and schedule estimation of a software development project. Through the flexibility of COCOMO, a software project manager (or team leader) can develop a model (or multiple models) of projects in order to identify potential problems in resources, personnel, budgets, and schedules both before and while the potential software package is being developed.

COCOMO an industry sponsored model that is being developed and maintained by the University of Southern California.

Project Management Professional Study Group

This is a not for profit site administered by a PMP. The site is dedicated to helping individuals learn about and pass the project management professional exam. Administered by the Project Management Institute. <http://www.pmpstudygroup.com/>

PMP-PREP

Based on PMBOK, available for four month sale 800 questions and answers. . Site includes a few sample questions and answers. www.pmp-prep

Moore Couture PMP Exam Preparation

The vendor offers a PMP preparation course for about \$1000 (Canadian). Included with the course is a the power point presentation notebook (available at \$150 Canadian). And available to subscribers is the speakers notes, PMBOK 2000 sample questions and answers. <http://www.moorecouture.com/>

PMP Cram

These people sell an electronic cop of PMP study guide or \$24.95 US
<http://www.pmptools.com/>

Walter Wawruck

Located in Western Canada. Walter offers a PMP preparation exam. His web site also has some sample exam questions <http://www.walter-wawruck.com/>

PM Information Services

PM Information Services have collectively employed and associated with the project management profession for over 20 years. In 2001, a number of the employees were

preparing to take the Project Management Institute (PMI®) certification exam. During the course of their studies, they felt there was a need to have an efficient way to drill ourselves on sample questions that be encounter on the PMP exam. As a result, a compilation of a number of sample questions in the form of handouts from various preparation classes were developed. From that, there came the desire to produce a affordable software product that may be of interest to you, the PMP® candidate. The material is probably base on PMBOK 1996 exam.

They offer 650 questions and answers on 3 ½ inch diskette for about \$28.00 US. The vendor provides the answers but not clarification or references.

<http://www.pminfo.com/>

Qualified Project Management Professional (QPMP)

Project Management Associates (PMA) is a non-profit registered professional body of projects and business managers with the aim of strengthening project management movement in India. PMA which came into existence in 1993 is India's National Project Management Association. QPMP is recognised globally and it is equivalent to Level D Certification of International Project Management Association (IPMA) , Switzerland. PMA's QPMP certification programme is based on the Association for Project Management (APM) UK's Body of Knowledge. APM, UK is the second largest national association of project management professionals in the world. <http://www.cepm.com/qpmp/qpmp.htm>

Heading change was called tools and methodologies

Tools

Builders.org

Providing tools that enhance collaboration and support knowledge management for construction projects. Within the site is free software for computing in construction and within the public is a number of project management tutorials.

Download a computer based tutorial program that will teach you how to schedule projects using the Activation on the Node or Arrow Diagramming Method of scheduling.

<ftp://www.buildersnet.org/CPMTeach/>

<http://www.buildersnet.org/ga/>

Learn how to perform Critical Path Method (CPM) scheduling using the Activity On the Node, or more commonly called, Precedence Diagramming Method.

<http://www.buildersnet.org/cpmtutor/>

Cost Xperts Group

Cost Xpert is PC-based tool to help project manager's jumpstart their project, understand its complexity and mitigate its risk early in the estimating game. It can also be used during project execution to continuously forecast the impact of changes. The beauty of this tool is in its simplicity: it provides a simple, easy to use product that's focused on the need for better quality estimates. Cost Xpert provides a convenient means for estimating project schedule, costs and resources.

Critical Tools

Microsoft Project add-on software allows you to plan and display your projects using a tree-style diagram known as a Work Breakdown Structure (WBS) Chart. WBS charts display the structure of a project showing how the project is broken down into summary and detail levels. Project Planning and Graphing Software <http://www.criticaltools.com/>

C/S Solutions

C/S Solutions, Inc. (C/SSI) is a world leading producer of integrated analytical tools for cost, schedule, and risk management. Their tools are specifically designed to engage Integrated Product Development (IPD) team members and/or Control Account Managers (CAMs) in proactive cost, schedule and risk management of complex programs.

The tools include: earned value and scheduling.

C/SSI is a full service company that provides program management software, consulting services, and training for organizations interested in proactive program management. <http://www.cs-solutions.com/>

IDash

Online monitoring of project deliverables, milestones, and budgets provide complete project status at-a-glance.

<http://www.idashes.net/>

Inventx

This company sells collaborative Project management tools and Product development tools. <http://www.inventx.com/Ns800/inventxnet.html>

Project KickStart

Project KickStart is a product to simplify and enhance project planning for individuals and teams. It helps users define project phases, clarify goals, establish tasks, anticipate obstacles and delegate assignments -- all the up-front thinking needed for organizing any project. The site includes some project planning "tips and trick" <http://www.projectkickstart.com/>

On Track Engineering

OnTrack Engineering, sells a project manager's tool: One that provides instant, accurate project status enabling timely decision-making. With complete cost and financial reporting, efficiently linking procurement, planning, material tracking and inventory control, CostTrack™ gives the project manager an easy, cost-effective way to guide projects to a successful completion. With CostTrack™ you never have to search for information, thus you not only have all the data, you have continually updated schedules and awareness of potential problems before they arise.

Ontrack can customize clients' proprietary databases to effortlessly link CostTrack™ to any number of other applications - including accounting, scheduling and other project management software. CostTrack™ allows for data consolidation from remote sites, and works with multiple currencies, manages multiple projects, and uses simultaneous multiple coding structures so clients, contractors and engineering teams can communicate most effectively. CostTrack™ is available as a Networkable, stand-alone package, or can be purchased to run entirely from the Internet, using CostTrack™ OnLine. <http://www.costtrack.com/>

Pacific Edge

The company offers two products **Portfolio Edge™** a Web-based application that provides full investment lifecycle management of multiple investment types; real-time multi-dimensional analysis and scenario planning; investment prioritization, selection, and sequencing; and closed-loop, shared planning amongst all stakeholders. And, **Project Office®** a tool for the ongoing management of the investments within the portfolio. Project Office allows the entire portfolio, or individual investments, to be created, managed and maintained over the Web.

PMP Practice Exams
http://www.moorecouture.com/seminars/pmp_prep/

PM Boulevard

PM Boulevard is a source for the latest and greatest in project management techniques, guidelines, templates, consulting and training. At PM Boulevard, you can find everything you need to take your business initiatives from concept to completion, with total control. The site includes a knowledge centre, an experts column and a nifty set of PMP preparation notes and sample questions.

<http://www.pmboulevard.com/>

PM Professionals

Site contains two papers "Take no risk with risk" and "Managing risk The Critical Factors in Successful Project Management". "Take No Risk without Risk" presents a comprehensive approach to effective risk response development. "Managing risk The Critical Factors in Successful Project Management" published in the February 1999 issue of Cost Engineering the article discusses the link between effective risk management and achievement of project objectives.

The site offers an excellent list of software project management tools, risk management and cost management software. <http://www.pmprofessional.com/>

PM Solutions

PM Solutions assists corporations in improving their delivery of projects. PM Solutions takes a holistic approach, addressing processes, people and practical experience. PM Solutions takes a hands-on approach. They work with your people, on your projects to improve project performance.

They assist in setting up a Project Office. Excellent source for list of project management books <http://www.pmsolutions.com/>

Procept Associates Limited.

Offers experienced services in project management consulting and training.

The company offers consultants with project management experience in engineering, information technology, new product development, telecommunications, aerospace and defence, government, construction and real

estate development. Many of their consultants are Professional Engineers. Most are also designated by the Project Management Institute as Project Management Professionals. Each consultant has at least 10 years of project management experience.

The company offers a PMP preparation course, few free articles and a variety of other project management training. <http://www.procept.ca/>

Process Impact

A software process improvement education and consulting company. United States based company that presents a variety of seminars and talks at your company. Assist in helping your software development projects improve their productivity, quality, and stability. Web site includes articles and references to software engineering books and Risk management Plan template. <http://www.processimpact.com/goodies.shtml>

Project Management Institute's Center for Project Management Knowledge and Wisdom

The goal is to become a totally electronic information center, it currently houses a strong collection of books and journals related to project management, a complete collection of *Project Management Journal*, *PM Network*®, and *PMI Today*®, as well as proceedings from PMI's Annual Seminars and Symposium conferences and agendas and minutes of PMI Board of Directors meetings. The Center is a source for project management information for all who are interested in the profession and the Institute-PMI members, project management practitioners, students, academic-business-government entities, the media, and the public. <http://www.pmi.org/k&wc/>

Project Net

Project Net is a commercial site that provides online PM tools with features including multiple project portfolios, workflow, best practice templates, scheduling, and document management. The site also has a free newsletter. <http://www.project.net/scripts/SaISAPI.dll/website/index.jsp>

Project Leaders

Offer Project management training <http://www.projectleader.com/>

Project Mentors

California based company. The company sells a Bi-monthly newsletter. Company offers Computer Based Training on: Project Management, Risk, Project Management Tools and Techniques. <http://www.projectmentors.com/>

RKS Software

RKS sells a variety of home and business based software one such product is "Things to do software" which includes project and Task management software (\$19.95 US). A 30 day download trial version is also available.

<http://store.yahoo.com/rks/thintodo.html>

RMC-Project Management

A United States based project management Training, Consulting and mentoring firm founded in 1991 to help large and small companies use the latest in project management tools and techniques to complete projects faster, cheaper, better, and with fewer resources.

The principle sells a PMP exam preparation book and offers classes in PMP exam preparation.

<http://www.rmcpjproject.com/>

SAS Institute

The project management capabilities of SAS software combine flexibility, versatility, and power. These tools enable you to plan, manage, track, and control multiple projects and their tasks with maximum realism and minimum effort -- and through a single integrated system. The software is adept at handling complicated situations such as multiple project modeling, resource priorities, complex project and resource calendars, substitutable resources, skill pooling, multiple precedence relationships, and activity deadlines.

Specific tools include a full-featured critical path scheduler, Gantt chart and PERT/network diagram generators, and a comprehensive, point-and-click project management system that enables you to build and schedule multi-project models and produce customized reports. Products include: Risk Dimensions, Cost Management, Project Management and Financial Management, for more information see <http://www.sas.com/products/or/index.html>

SpeedDEV – Software Cycle Process Management

SpeedDEV is a web-based software and hardware development lifecycle [process management](#) software, with integrated Requirement Management, Issue Management, Time Management and Project Planning Tools, in a single interface. SpeedDEV is designed to allow all the participants in a Software Project to participate and exchange information about the Project following a [process](#) defined by the project manager, independent of the location and time zone of a particular participant. The product uses a knowledge base of the things that made projects successful: Best Practices, Collaboration and fundamental software engineering principles. For more details see <http://www.speeddev.com/>

Strategic Project Management Services

A Canadian company with office all over the world. Makers of a product called PM Blazer. Publishers of a free newsletter called the "Triple Constraint". Provide apparently excellent training. **Note** site does not work properly with Netscape.
<http://www.spmgroup.ca/>

Standish Group

Project Manager book store, project management research and the authors of the Chaos report.
<http://www.pm2go.com/>

The CBT Workshop

The CBT Workshop products and services are focused on project and performance management disciplines and include the following: Interactive Computer Based Courseware; Traditional Instructor-led Training; Web Based Testing and Certification; CBT Publishing Services; Consulting Services; MPMTM Implementation and Training; and Microsoft Project Training. Current courseware encompasses the following topics: Earned Value Management Systems (EVMS) Fundamentals, Mastering Insight, Program Management, Effective Communications, Project Risk Management, Proposal Development, Planning and Scheduling, and Microsoft Project for Non-Schedulers
<http://www.cbtworkshop.com/>

The Neal Whitten Group

<http://www.nealwhittengroup.com/>

University Of Toronto

Advanced Certificate in Project Management <http://www.pdc.utoronto.ca/>

Yourdon

Ed Yourdon is currently posting a chapter on managing Internet Projects.
<http://www.yourdon.com/>

Welcom

The Company Welcom is a global leader in providing project management solutions to corporations worldwide. Their goal is to provide quality project management software and associated services for organizations for which serious project management is a critical business requirement. The Welcom product suite is a totally integrated, functional and versatile solution for managing both individual and enterprise wide project environments.

Established in 1983 by a team experienced in the discipline of professional project management, Welcom is a privately held company that maintains its corporate headquarters in Houston, Texas, USA, with marketing and technical support offices in the United Kingdom, France, and Thailand and partners worldwide.

The site includes white papers, products: Corba (Cost/Earned Value Management), WelcomeHome (Project collaborative tool for distributed teams) and Open Plan (Enterprise wide project scheduling), related links, newsletters, Glossary PM terms, books, user stories and a nice list of project management articles for more information see <http://www.welcom.com/about/index.html>

Western Carolina University

PMP Review Certification Course <http://cess.wcu.edu/conted/disted/pmp/>

4PM

Company offers electronic newsletter (3-4 pages) on project management topics, called PM talk. Offers PMI study books and variety of reference material. One of the books they publish is a PMP exam preparation book called 'The Project Managers' desk Reference' by Thomas. Site include articles <http://www.4pm.com/>

Australia

Rob Thomsett

Third Wave in Project Management the Thomsett company is recognised as one of most innovative and effective project management groups. They provide consultancy and education in three areas - Project, Team and Quality Management.

The site has a copy of his book " The Busy Person's Project Management Book" by Rob and Camille Thomsett. The site also has references to article, books and project management tips. <http://www.thomsett.com.au/>

India

Projects Today

Projects Today is the first online database covering 7240 LIVE Indian projects entailing a total projects investment of around Rs.17,70,000 crore (US\$ 370 billion). The database provides comprehensive information on projects (capital) investments either under execution or envisaged in India. Projects Today tracks investment projects from inception through the completion stage.

Projects Today is business opportunity identifier and an essential tool for analysis and marketing for the professionals in industry, government, finance, academics and research. Other features of Projects Today include project tenders, government policies and guidelines, industry and state news, and investment-related statistics, for more information see <http://www.projectstoday.com/>

Project Bids and Postings

eLance

Post a project or bid on a project worldwide pool of highly skilled IT professionals go right to work for you. Here's how it works:

- Post your project online with eLance.
- Monitor your bids from skilled professionals and businesses.
- Choose most qualified bidder.

Don't have enough time to get online? Try "eLance By Phone" and talk live to a customer service representative who can help you post your project, or answer any questions you might have. www.eLance.com

Project Management Office

PMO To Go

A Houston based consulting company proving PMO services.
